## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of claims 1-12, 16-19, and 23 in the reply filed on 5/5/05 is acknowledged. The traversal is on the ground(s) that the embodiments are related and a search of all embodiments would not be burdensome. This is not found persuasive because the set of claims to the valve would require a completely different search than the set of claims to the brake and it is the Examiner's position that doing both such searches would indeed be overly burdensome.

The requirement is still deemed proper and is therefore made FINAL.

Claims 13-15 and 20-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5/5/05.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12, 16-19, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Orit.

The O'rii reference discloses a brake structure comprising a rotor 1e, a rotor axis 7, a brake 8 made of rubber (see col. 3, lines 24-27), a central portion/base part 8a, a case 6, a mortise (opening in 8a), a friction parts 8b and 8c, a flexible parts (between 8a and 8b and 8c), a brake latching end 7b, a rotor latching end/rotor bushing 7a, and non-circular sections/hysteresis rings 7c.
